JENEL ESTERON

COMPUTER ENGINEERING

Technological Institute of the Philippines (TIP) M

Address: **141 - C 15th Avenue Taguig**

Email Address: **mjesteron@tip.edu.ph**

Cellular No.: **+639063749610**

CAREER OBJECTIVE

Seeking to secure an position in Penetration Testing, or Network Security, the candidate offers a robust foundation in Cisco networking and cybersecurity fundamentals. Their profile is highlighted by hands-on experience in Capture The Flag (CTF) competitions, demonstrating a balanced proficiency in both defensive and offensive security tasks. They aim to contribute to a professional security team while gaining invaluable real-world industry exposure.

DESIGN PROJECTS COMPLETED/ RESEARCHES

PeerQuest: Gamified Freelancing Quest-Based System (June 2025 - July 2025) A full-stack gamified freelancing platform where students (Adventurers) complete tasks (Quests) posted by clients (Quest Makers). Technologies: Frontend: Next.js modular components, TailwindCSS Backend: Django REST Framework, MySQL, Redis Infrastructure: Docker containers, RESTful APIs, real-time updates Key Features: Secure authentication, job management, skill tagging, gamified leveling system, user dashboards Role: Full-stack developer responsible for architecture, API logic, authentication flow, and production-level UI/UX.

E.C.O. Bin: Efficient Classification and Organization Bin (January 2025 - May 2025))

Brief Description: A smart waste segregation system using AI (CNN recognition), multi-sensory detection, and IoT to automatically classify biodegradable and non-biodegradable waste for improved cleanliness and efficiency in school environments. Role & Outcomes: Role: Backend/AI Developer & Hardware Integration Developed the AI waste-classification model and sensor-processing logic. Integrated IoT monitoring and actuator controls. Delivered a functional prototype that met client needs (automation, accuracy, user-friendliness). Improved waste-handling efficiency and reduced manual sorting.

KNOWLEDGE, SKILLS AND ATTITUDE

An upcoming graduate from TIP with its orientation towards outcome-based education, I have acquired and can demonstrate the following student acquire outcomes (knowledge, skills and attitudes) necessary to the practice of the computing profession:

- Analyze complex problems and identify and define the computing requirements appropriate for solution.
- Use modern techniques and tools of the computing practice in complex activities.
- Understand professional, ethical, legal, security and social issues and responsibilities relevant to professional computing.

Knowledge & Technical Skills

- Cisco networking fundamentals (VLAN, DNS, ACL, routing, wireless essentials)
- Enterprise networking, security, and automation
- Cybersecurity: network exploitation, web exploitation, cryptography, reverse engineering
- Full-stack development: Next.js, Django REST Framework, MySQL, Redis
- API development and containerized deployment (Docker)
- Capture-the-Flag (CTF) methodologies and problem-solving

Skills & Attitude

- Strong analytical, troubleshooting, and debugging skills
- Team leadership (CTF team captain)
- Persistent, challenge-driven mindset
- Collaborative and adaptable in fast-paced technical environments

LEADERSHIP ACTIVITIES

- **CTF Team Captain** – Led teams in Trend Micro CTF, EC-Council CTF, and HEXCORE PH competitions. Guided team strategies in network exploitation, cryptography, reverse engineering, and web vulnerabilities
- **ECO Bin – AI Waste Segregation Project**
  I led the development and integration of the hardware and AI components of the ECO Bin system, ensuring smooth coordination between software and embedded logic. My role involved guiding the team during sprints and aligning our output with client requirements as the Team Lead and Backend/AI Lead under the TIP ECO Bin Research Team.
- **PeerQuest Freelancing Platform**
  I served as the Auth & Profile Lead Developer, managing the full authentication flow, Google OAuth integration, and user profile system. I coordinated closely with the UI/UX and backend team to keep the platform consistent with the project''s fantasy-themed vision.
- **Capstone Year-Long Thesis Project**
  As the Project Manager, I organized sprints, delegated tasks, synchronized team progress, and ensured our documentation and technical outputs met academic and client standards. I directed the whole workflow across software, hardware, and research components under the TIP Capstone Team.
- **UN SDG Ideathon (3-Day Event)**
  I coordinated the full planning of the 3-day ideathon, organizing speakers, schedules, and event logistics. My role ensured smooth execution across multiple teams and departments for the TIP Research & Innovation initiative.
- **COESS (Computer Engineering Student Society)**
  I served as Event Planning Head for a major COESS activity, overseeing program structure, coordination, and on-ground event flow. I ensured all logistics, scheduling, and team responsibilities were aligned for a successful department-led event.

SEMINARS AND TRAININGS ATTENDED

- Transforming Future: Computer Vision and Generative AI for Smart Cities
  TIP Casal PC12
  June 19, 2025

- Transforming Future: Computer Vision and Generative AI in Computer Engineering
  TIP Arlegui Seminar Room
  June 26, 2025

- Into the Cloud: The Future of Computing
  TIP Arlegui Seminar Room
  June 28, 2025

- CODEBUILD POCKET EDITION: Discover The Building Blocks of Mobile Development
  TIP Arlegui Seminar Room
  July 08, 2025

EXTRA AND CO-CURRICULAR ENGAGEMENTS AND VOLUNTEER WORKS

- Ramon Avancena Highschool
  Brigada Eskwela Volunteer
  June 08, 2025 - June 09, 2025

- Trend-Micro
  CTF participant
  August 26, 2025

- HEXCORE PH
  CTF participant
  October 06, 2025

- Ramon Avancena Highschool
  Cybersecurity Seminar Host
  October 22, 2025

- CISCO: ASEAN CYBERRACE CTF
  CTF participant
  November 14, 2025

- IPOPHIL
  Competition Participant
  November 12, 2025

OTHER SKILLS

- **Cybersecurity & Problem-Solving:** Experienced in Capture The Flag (CTF) competitions, demonstrating rapid vulnerability identification, exploitation, and mitigation under time pressure.
- **Network & System Security:** Knowledge of network protocols, firewalls, and secure system configuration.
- **Web & Application Security:** Familiar with common web vulnerabilities (e.g., XSS, SQL injection) and secure coding practices in Python and JavaScript.
- **Programming & Scripting:** Proficient in Python and JavaScript for automation, security tools, and web development.
- **Version Control & Collaboration:** Experienced with Git and GitHub for code management and team projects.
- **Data Analysis & Presentation:** Advanced Microsoft Excel and PowerPoint skills for analyzing data and presenting technical findings.
- **Communication & Documentation:** Strong technical report writing and effective communication skills.
